| VA863 | Virgin Australia | Melbourne | Sydney | 21 July 2020 | Further information pending |
| VA977 | Virgin Australia | Sydney | Brisbane | 21 July 2020 | Further information pending |

We are in the process of contacting people from these flights after a passenger tested positive to COVID-19.

We ask that passengers of these flights, who have not already been contacted by Queensland Health, to call [13 HEALTH \(13 43 25 84\)](tel:13432584) and advise that you were a passenger on this flight.

Please note that public contact tracing alerts are removed after 14 days as they are no longer applicable.

Contact tracing for COVID-19

If a person gets a positive test result for COVID-19, we do what is called 'contact tracing'. This is to prevent the virus spreading further through the community. It is the same process that we use with other contagious viruses like measles.

As part of this process, we speak to the sick person to find out who might have had close contact with them when they would have been infectious.

If there are people who had close contact with the sick person, our staff get in touch with them directly. If they start showing symptoms, we get them assessed faster and take the right action.

If we can't find the people who had been in close contact with a person who tested positive, we will issue an alert on our website and through media and social media. This lists the dates, times and places where the sick person was. We ask the public who may have had contact with that sick person at one of those times or places to contact us.

Close contact

Close contacts are people who have had face-to-face contact with a confirmed or probable case for more than 15 minutes in total over the course of a week. For example, having three chats of five minutes each over seven days is considered 15 minutes total contact.

Close contacts are also people who have shared an enclosed space with a confirmed or probable case for more than two hours.

This contact period is counted from 48 hours before the start of the person's symptoms.

We are not looking for people who passed the sick person on the street or in a shop, as the risk to them is extremely low.

If you have been in close contact with someone who has been confirmed having COVID-19, you need to [quarantine](#). This is for 14 days from when you were last in contact with them. If you become unwell during that period, see a doctor immediately.

30 JULY 2020

To our sport and recreation community,

Under Stage 3 of the easing of restrictions, it is important to remember that all sport, active recreation and fitness organisations must comply with an approved [Industry Covid-safe plan](#).

Approved [Industry Plans](#) **restrict access to anyone who has:**

- COVID-19 or has been in direct contact with a known case of Covid-19 within the last 14 days
- Flu-like symptoms or who is a high health risk (e.g. due to age or pre-existing conditions)
- Travelled internationally
- Travelled to a Covid declared hotspot.

With recently reported positive COVID-19 cases confirmed in Queensland, please note the advice below and ensure your organisation and members are aware of these developments.

1. Individuals who have been in close contact with a confirmed positive COVID case will be issued with quarantine directions by the Public Health Unit which will require them to isolate for 14 days.
2. The Public Health Unit may be requesting contact tracing information from organisations today which must be provided within 1 hour of the request.
3. If you or a family member are exhibiting any signs or symptoms of being unwell, please contact your GP or your local Queensland Health Fever and Respiratory Clinic.

In line with the above, any person who has visited affected locations identified by Queensland Health should not attend organised sport, active recreation or fitness activities until further information on the situation comes to hand. These locations can be found here via the [contact tracing alerts page](#). You can also stay up to date with all COVID-19 Queensland Health alerts [here](#).

Clubs are strongly advised to keep monitoring the situation in the implementation of its [Industry Plan](#) and ensure that contact tracing is in place in the event of a positive test.

Please contact the COVID Hotline on (07) 3330 6166 or COVID email SR_Covid19@npsr.qld.gov.au should you have any queries on the above.

Regards

Andrew Sly
Assistant Director General
Housing, Homelessness & Sport
Department of Housing and Public Works
